CamberChek™ Gage

The CamberChek™ Gage provides the actual measurement of the amount of bow or camber in a bolt or screw quickly and easily. This gage is suitable for use in SPC programs for controlling manufacturing processes as well as for final inspection. The CamberChek can be connected to a printer or computerized inspection systems for recording results. This gage meets or exceeds the requirements of ASME B 18.2.1

Step 1 - Zeroing the gage

**Step 2 - Bow of bolt turned to top of gage.
Camber indicated on gage indicator.**
