

Greenslade & Company, Inc

**Fastener Inspection Equipment
Innovative Gage Design
Dimensional Calibration**

LENGTHCHEK™ for improved fastener measuring!

Greenslade's **LENGTHCHEK™** makes measuring lengths of fasteners and various parts fast, easy and accurate. Our patented gages offer improvements over the more tedious methods of the past, such as using the back end of calipers, scales or handheld rulers. Such methods are cumbersome, time consuming, and inaccurate. When time is a factor, our **LENGTHCHEK™** can measure various fasteners and parts up to 4 times faster than conventional methods. The **LENGTHCHEK™** is ideally suited for use in production, as well as incoming and final inspection applications.

Our most popular model, the LG-006E (pictured above) has up to a 6" (150mm) capacity with a .0005 resolution. All models come with data export capability as well as an A2LA accredited, ISO17025 calibration certificate at no additional charge.

We also offer:

- > LG-002E (2 INCH)
- > LG-012E (12 INCH)
- > CUSTOM MADE

At Greenslade, we believe the most effective gage is:

1. Accurate
2. Simple to use
3. Efficient
